

Dear customers, thank you for using our products, please read the instructions before installation.

PRODUCT FEATURES

1. With the unique design, it is safety and high heat dissipation;
2. Unique structural design, the assembly structure is simple and practical;
3. Highly effective and energy saving, it can directly save up to 80% of electricity, and enhance luminance;
4. Unique isolation circuit design, safety, reliability, and stability;
5. The installation is easy. It can replace the traditional lamp directly. While installation, it is necessary to disable the existing ballast / choke from operations (supply 230V directly to the socket of the lamp).

APPLICATIONS

CORN LIGHT LED is a replacement for CFL, mercury and sodium lamps. It can be used in all kinds of commercial, industrial and public lighting; commercial lighting such as supermarkets, large shopping malls; industrial lighting such as factories, large waiting hall, airports, exhibition halls; public lighting such as streets, parking lots, etc.

WARNING

Installation must be done strictly according to the instructions, otherwise it may cause electric shock or dropping accident.

WARRANTY

This product is guaranteed for 3 years from the date of sale. The warranty does not cover defects caused by improper handling.
